SOFTWARE DEVELOPMENT PROJECTS

FRONT-END DEVELOPER

Playtime Weather

<https://playtimeweather.netlify.app/>

10/2022 - 12/2022

- Developed and deployed a weather app that inputs the user's city location.
- Utilized the Open Weather Map API to retrieve current weather data using RESTful web services.
- Built a weather forecast component that translates data to the user interface with proper emphasis on different weather titles, such as clouds, clear, mist, rain, wind.
- Executed state management using React hooks and conditional rendering of components.

FRONT-END DEVELOPER

CountHydrants

<https://firehydrantcounter.netlify.app/>

05/2022 - 06/2022

- Developed and released a simple HTML, CSS and JavaScript counter that makes use of the increment and decrement features.
- Implemented an engaging user interface that allows users to count fire hydrants, declining daily walk boredom by 60%.
- Formed a feature that stores previous count entries for short-term future reference.

FRONT-END DEVELOPER

React Portfolio Site

<https://ashleydelic-portfolio.netlify.app/>

03/2022 - present

- Created and deployed a personal portfolio website from scratch showcasing my experience and projects.
- Employed the use of the Create React App to bootstrap the entire development.
- Executed the Tailwind CSS library to scan all of the HTML files, JavaScript components, and other templates for class names, generate the necessary styles, and write them to a static CSS file.

FRONT-END DEVELOPER

Listen Here, My Child.

<https://kidquotegenerator.netlify.app/>

11/2022 - 12/2022

- Crafted and deployed a random quote generator for anyone to brighten a child's day.
- Made use of the JavaScript Math Random feature by collecting random quotes which in turn generates them to the user.
- App proven by my toddler to increase positive mood significantly.
