<https://github.com/ashleydelic>

I am a software developer with a strong interest in learning, innovation, and technology. I want to put my experience to good use and learn among professionals.

### SKILLS

- HTML 5
- CSS 3
- JavaScript
- Customer service
- React.js
- Tailwind CSS
- Node.js
- Communication
- Git/GitHub
- Figma
- Problem-solving
- MySQL

### SOFTWARE DEVELOPMENT PROJECTS

#### FRONT-END DEVELOPER

Playtime Weather

<https://playtimeweather.netlify.app/>

10/2022 - 12/2022

- Developed and deployed a weather app that inputs the user's city location.
- Utilized the Open Weather Map API to retrieve current weather data using RESTful web services.
- Built a weather forecast component that translates data to the user interface with proper emphasis on different weather titles, such as clouds, clear, mist, rain, wind.
- The app still needs work. I am in the process of learning more on how to render other components such as humidity, wind speed and the weekly forecast.
- Executed state management using React hooks and conditional rendering of components.

#### FRONT-END DEVELOPER

CountHydrants

<https://firehydrantcounter.netlify.app/>

05/2022 - 06/2022

- Developed and released a simple HTML, CSS and JavaScript counter that makes use of the increment and decrement features.
- Implemented an engaging user interface that allows users to count fire hydrants, declining daily walk boredom by 60%.
- Formed a feature that stores previous count entries for short-term future reference.

#### FRONT-END DEVELOPER

React Portfolio Site

<https://ashleydelic-portfolio.netlify.app/>

03/2022 - present

- Created and deployed a personal portfolio website from scratch showcasing my experience and projects.
- Employed the use of the Create React App to bootstrap the entire development.
- I had to reference to a lot of documents while creating this app, which made me gain incredible knowledge on what goes on behind a good portfolio page. This is the second build as the first build crashed.
- Executed the Tailwind CSS library to scan all of the HTML files, JavaScript components, and other templates for class names, generate the necessary styles, and write them to a static CSS file.

### WORK EXPERIENCE

#### HOUSE MANAGER

Home

12/2020 - present

- Cared for a baby boy, which specialized in generating engaging and educational activities while perfecting problem-solving and multitasking skills.
- Responsible for the logistical aspects of precious cargo, household inventory, and supply management.

#### WAREHOUSE ASSOCIATE

Amazon

02/2020 - 12/2020

- Located and extract merchandise from shelves and storage areas.
- Inspected merchandise for damage, flaws, and irregularities.
- Packed merchandise for delivery.

#### MEDI-SPA THERAPIST

OneSpaWorld

05/2017 - 03/2019

- Worked hand-in-hand with a spa physician to perform different types of beauty treatments, massages and wellness therapies.
- Conducted body consultations and tailored relevant treatments to clients.

### EDUCATION

#### SOMATOLOGY

University of Johannesburg

2014 - 2016
